

Built to Keep You in Flow State

The first agentic IDE, and then some. The Windsurf Editor is where the work of developers and AI truly flow together, allowing for a coding experience that feels like literal magic.

INTRODUCING THE FLOW EVOLUTION OF CHAT

Cascade

Cascade combines deep codebase understanding, a breadth of advanced tools, and a real-time awareness of your actions into a powerful, seamless, and collaborative flow. It is the most powerful way to code with AI.

Full contextual awareness

Deep contextual awareness allows you to run Cascade on production codebases and still get relevant suggestions.

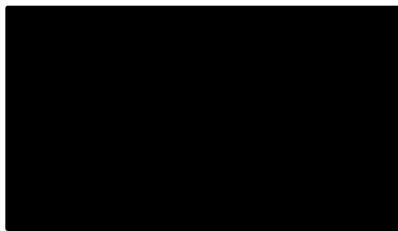

Tab Tab Tab...Ship

A single keystroke, limitless power, complete flow. The full power of Windsurf Tab is exclusive to the Windsurf Editor. Our IDE plugins include only the autocomplete action.

Autocomplete

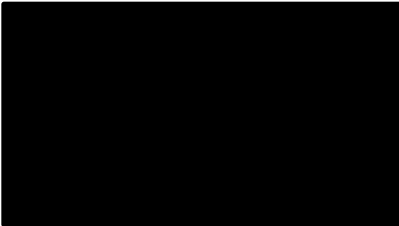

Generative code that saves you time and helps you ship products faster.

Devin in Windsurf

the Agent Command Center and organize tasks with Spaces.

Cloud agent

Plan with Cascade, hand off to Devin with one click. Devin spins up its own machine and works while you focus on what's next.

Agent Command Center

A Kanban-style dashboard to manage every agent — local Cascade sessions and cloud Devin sessions — in one place.

Spaces

Bundle agent sessions, PRs, files, and shared context around a single task so you never lose your place.

Windsurf Previews.
See it. Shape it. Ship it.

See your website live in the IDE, click on any element, and let Cascade reshape it instantly—exactly how you want

NEW FEATURE

Devin in Windsurf

Delegate complex tasks to Devin, our autonomous cloud agent that works on its own machine while you keep coding

Devin is working

TASK

Fix authentication bug in login flow

PR #142 ready for review

NEW FEATURE

Agent Command Center

Manage every agent — local Cascade and cloud Devin sessions — in one unified Kanban-style dashboard

IN PROGRESS

Cascade

Refactor API layer

Devin

Add test coverage

READY

Devin

Fix CI pipeline

NEW FEATURE

Spaces

Bundle agent sessions, PRs, files, and shared context around a single task so you never lose your place

Auth Overhaul

Cascade: Plan auth changes

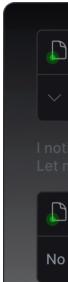

Devin: Implement OAuth flow

PR #89 · 3 files

Linting

If Cascade doesn't will automatically

superpowers of their own.

94%

PERCENT OF CODE WRITTEN BY AI

Our AI removes the vast amounts of time spent of boilerplate and menial tasks so that you can focus on the fun and creative parts of building.

59%

FORTUNE 500 COMPANIES BUILD WITH WINDSURF

Windsurf powers mission-critical systems and accelerates software development for the world's leading companies.

The Original Launch

An AI-native editor built from the beginning to understand software development, customize to your unique work, and become your perfect pair programmer.

The Windsurf Editor (World's First Agentic IDE)

Windsurf

A large rectangular area representing a video player. It contains a small play button icon in the bottom left corner and the text 'Watch on' in the bottom right corner.

Case Study Testimonials

We are pleased to induct Windsurf into the JPMorganChase Hall of Innovation. Windsurf has demonstrated a novel approach to generative AI for software development, enabling our developers to quickly become productive on new and heritage codebases, iterate on new capabilities, and focus on delivering business value.	Speed and trust are everything to us. As we continue to expand our platform and operations, we're investing in tools that help our teams work more efficiently and sustainably. We adopted the Windsurf Editor as part of our strategy to support developer productivity and streamline how we build at scale. We are excited to see how this collaboration can help us move faster while maintaining the technical excellence our users expect.	We work with highly critical systems and sensitive information that must be protected to safeguard the lives of patients being treated by physicians. At athenahealth, we take a rigorous approach to every technology decision. With Windsurf, we uphold our standards and empower our teams to build quickly.	Our code is ir strictly config GitHub Copil options. We c generative AI environment, (Windsurf), it 'easy' button.
