JetBrains AI Solutions

Optimize your workflow.
With AI built for you.

We build smarter, more efficient tools to make your development workflow faster, more productive, and enjoyable. Choose the AI support that suits you best: from AI-powered code assistance to full automation of coding tasks right within our IDEs. Powered by our proprietary models and best-in-class AI, our solutions are responsibly designed to ensure transparency, protect your privacy, and keep you in control.

AI that fits your development needs

AI in JetBrains IDEs

Top-tier coding agents and AI-powered workflows are enhanced by deep IDE code intelligence. Built as an open platform, JetBrains IDEs give developers the freedom to choose how they use AI and which agents and providers they rely on, without vendor lock-in.

 Air

Run beloved agents side by side

JetBrains Air is an Agentic Development Environment where Codex, Claude Agent, Gemini CLI, and Junie execute independent task loops without interfering with each other.

Win a MacBook Pro!

Koog

JVM-native framework for building AI agents

Build intelligent agents capable of handling complex workflows and engaging in context-aware conversation. Koog is an innovative, open-source agentic framework that empowers developers to build enterprise-ready AI agents for the JVM in Kotlin or Java.

Optimized for your tasks

Deeply integrated into your IDE, our own models work together with best-in-class AI to help you tackle any task with the right solution.

Privacy you can trust

Your code and data remain entirely yours – we never use them to train AI models.

Your choice of AI

Easily switch from light AI assistance to deeper automation – or none at all! You decide how much AI works for you.

Secure and flexible

terms

Responsible use of intellectual property

Proprietary models are trained solely on public, permissively licensed code. The models are designed to respect intellectual property rights and ensure compliance with all applicable legal and ethical standards.

Data retention and compliance

JetBrains does not persist customer data unless users explicitly opt in to detailed data collection, which is used exclusively to improve product quality. No data is retained by third-party providers.

Full data and model control

With on-premises solutions, you have complete control over your data and model management to ensure it conforms to your company's security, privacy, and compliance standards.
